

# Discover® Global Network Account Updater

## Stop Missing Out on Recurring and Stored Payments

Processing payments with no interruption is vital to your business and now you don't have to worry about expired cards or outdated payment information. Account Updater is a simple tool that updates your recurring and stored card-on-file payment accounts, so you can keep processing payments with no interruption.

## Updates Made Simple: How Discover® Global Network Account Updater Works

Merchant sends an inquiry containing all of their recurring and stored accounts to Discover® Global Network. Merchant updates the accounts before processing payments.

Discover® Global Network sends back a list of accounts with updated account information to the merchant.

Issuer sends new or updated card account information to Discover® Global Network.

## The Right Solution for you and your Customers

### Merchant Benefits

- Increase transaction approval rate
- Reduce customer service costs by preventing payment interruption
- Reduce customer attrition
- Provide a seamless transition from old account to new account

### Cardholder Benefits

- Provide seamless updates—eliminates need for cardholder to update their account manually
- Eliminate hassles of missed or late payments due to transaction declines
- Ensure a positive customer experience

## Don't Lose Another Payment! Get Started Today!

### Step 1: Enroll

Contact your Discover® Relationship Manager for the enrollment form.

### Step 2: Connect

Create a new secure FTP connection.

### Step 3: Activate

Certify that you can transfer files and send and receive updates.

### Step 4: Implement

Start submitting inquiries to update your card-on-file accounts.
